

Project: FCM Municipal-First Nations Community Infrastructure Partnership Program (CIPP)

Client: Federation of Canadian Municipalities

Key Deliverables: CIPP Toolkit Guidelines for Joint Community Sustainability, CIPP Workshop Presentation Material and Summary/Evaluation Reports.

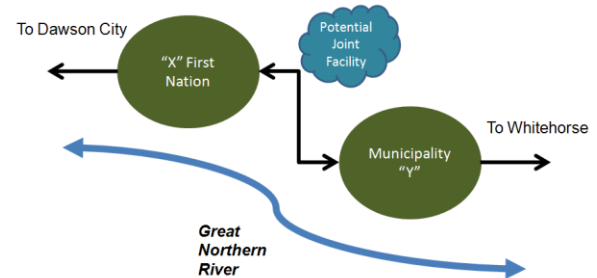

Timeline: April 2011 – June 2011

WCS Role: The Centre researched and wrote the CIPP Toolkit's Community Sustainability Planning unit, researched and prepared workshop materials, facilitated a workshop on the CIPP Toolkit in the Yukon with First Nation, municipal government, and territorial representation, and prepared reports on workshop findings and participant feedback.

Project Details

The joint Community Sustainability Planning (CSP) guide is a new feature of FCM's CIPP Toolkit, an excellent resource for municipalities and First Nations communities to help work together on infrastructure service agreements and joint projects. The guide introduces joint community planning and sustainability planning, providing a process overview, a checklist describing process steps, methods for partnership building and community engagement, and a range of tools for implementing CSPs in the municipal/First Nations context, with a focus on infrastructure. The Centre then worked with FCM staff to design and facilitate a workshop to introduce and apply the CIPP Toolkit for Yukon communities, where 8 of 9 municipalities are co-located with First Nations communities, including integration of sustainability planning into infrastructure servicing.

Scenario Context Map

CIPP Toolkit Workshop – 18 May 2011
